PROFESSIONAL SUMMARY

BSc Information Technology, Kampala International University — degree requirements completed; graduating November 2026, with hands-on experience in IT support, web development, and digital systems management. Founder of Solomantalgo Web Design — delivering websites and brand identities to small businesses across Kampala. Experienced in end-to-end project delivery, client-facing technical support, hardware and software troubleshooting, and network administration. Built and deployed real working systems for paying clients including a live ecommerce platform and an IoT smart meter project. Available to start immediately.

WORK EXPERIENCE

IT and Digital Support · Kookee Enterprises Limited · Kampala *Sep 2025 – Jul 2026*

Device Management · Digital Systems · Technical Support · Ecommerce Platform

- Provided daily IT support to staff — managing company devices, troubleshooting hardware and software issues, and maintaining digital systems and communications infrastructure.
- Built and deployed a fully functional React and Vite ecommerce platform currently live and in use, integrated with the company's main WordPress website.
- Managed company WhatsApp communications, social media platforms, and digital reporting tools across the organisation.
- Generated inventory and sales reports from Excel data, improving operational reporting speed and accuracy.
- Handled technical onboarding of digital tools for staff and provided guidance on system usage and best practices.

Founder and Web Developer · Solomantalgo Web Design — Freelance · Kampala *2024 – Present*

HTML · CSS · JavaScript · Node.js · Google Apps Script · SEO · Client Management

- Founded and operate a freelance web design business delivering professional websites and brand identities to small businesses across Kampala.
- Manage full client lifecycle independently — discovery, requirements gathering, scoping, development, deployment, and post-launch support.
- Delivered complete digital presence solutions across restaurant, salon, clinic, laundry, bridal, and portfolio industries.
- Set up Google Analytics 4, Google Search Console, and SEO metadata for clients — tracking post-delivery performance and identifying improvement areas.
- Built a structured three-tier pricing system and self-built CRM for lead tracking and follow up management.

Salesperson · Emerald Grocery — Middle East Restaurant Group · Bukoto *Apr – Aug 2024*

- Delivered customer service and handled daily sales transactions in a fast-paced retail and hospitality environment.

- Supported stock management and merchandising activities while maintaining accurate records of daily transactions.
- Built strong communication and problem-solving skills through consistent interaction with a diverse customer base.

KEY PROJECTS

Automated Yaka Token Entry System — KIU Final Year Project · 2025 – 2026

ESP32 · Node.js · SQLite · Africa's Talking USSD · REST API · Five-Member Team

- Led system architecture and firmware development for an IoT smart meter — automatically entering electricity tokens via ESP32 hardware relay, eliminating manual entry errors.
- Built full Node.js backend with HTTP polling server, SQLite database, REST API, and USSD integration via Africa's Talking.
- Managed a five-member team through hardware and software integration challenges from concept to working prototype.

Kookee Cart — Live Ecommerce Platform · 2026

React · Vite · Vercel · GitHub — kookee-cart.vercel.app

- Built and deployed a fully functional ecommerce platform for Kookee Enterprises — integrated with their main WordPress website via redirect linking.
- Sole developer responsible for architecture, development, deployment, and full handover documentation.

BiteRight Restaurant — Complete Digital Presence · 2025 – 2026

HTML · CSS · JavaScript · Google Analytics 4 · Canva · Google Apps Script

- Delivered website, digital menu, QR codes, social media assets, and business cards for a Kampala restaurant.
- Set up GA4 event tracking and Google My Business — monitoring post-launch traffic and performance.

Merchandiser Tracking System · 2024

React · Java · Spring Boot · MySQL

- Built and deployed a fullstack web application for tracking field reports and stock data using React, Java/Spring Boot, and MySQL — gaining practical experience with Spring Boot while still developing deeper proficiency in the framework.

TECHNICAL SKILLS

IT Support	Hardware troubleshooting, software installation, device management, peripheral setup, user support, helpdesk ticketing
Operating Systems	Windows 10/11 administration, basic Linux command line, OS installation and configuration
Networking	LAN/WAN basics, IP addressing, DNS, DHCP, router and switch configuration, WiFi troubleshooting
Web Development	HTML, CSS, JavaScript, React, Node.js, REST APIs, Java (basic syntax and programming fundamentals), Spring Boot (junior-level project experience), Google Apps Script, Vercel deployment
Database	MySQL, PostgreSQL, SQLite — queries, joins, data management, basic administration
Security	Basic cybersecurity principles, access control, data protection, antivirus management

Design	Canva — social media assets, business cards, digital menus, brand identity materials
Analytics	Google Analytics 4, Google Search Console, Google My Business — setup and monitoring
Tools	Git, GitHub, VS Code, Google Workspace, Microsoft Office — Excel Advanced, Word, PowerPoint
AI Tools	ChatGPT, Claude AI, Google Gemini — used daily in development and support workflows
Languages	English (fluent), Basic Luganda
